Hospital and Department Overview

UMass Memorial Medical Center (UMMMC) is an 800+ bed academic medical center and is part of UMass Memorial Health, the largest health care system in Central Massachusetts. We are the clinical partner of UMass Chan Medical School, with access to the latest technology, research, and clinical trials. The Medical Center consists of three campuses in Worcester, MA: University, Memorial, and Hahnemann Campus.

Since starting the pharmacy residency program in 1995, we have made a significant impact on patient care by becoming an integral part of the medical teams through working directly on the hospital floors and guideline/policy development. We strive for excellence in the training of pharmacy residents, providing a positive and rewarding learning experience. Our programs are committed to training that respects the diversity of our residents and our patient population with an emphasis on professional development and wellness.

General Information

The PGY1 Pharmacy Residency Program is a yearlong, accredited program designed to build on Doctor of Pharmacy (PharmD) education and contribute to the development of clinical pharmacists responsible for medication-related care of patients with a wide range of conditions, eligible for board certification, and eligible for postgraduate year two (PGY2) pharmacy residency training. Over the course of the year, residents will have the opportunity to provide high-level pharmaceutical care in a variety of patient care settings and gain experience in the management of acutely ill patients. Residents will also lead a research project, strengthen their communication skills through formal and informal presentations in a variety of settings, participate in various interdisciplinary hospital committees, and complete a teaching certificate program. Teaching opportunities are provided through regional colleges of pharmacy as well as our affiliated medical school. Residents are supported throughout the year through a formal mentor program.
